EDUCATION

B.S. in Electrical Engineering, Power and Renewable Energy Track — **Spring 2028 (Expected)**
Minor in Engineering Leadership, Minor in Computer Engineering — Orlando, Florida
University of Central Florida

Associate of Arts — **Fall 2024**
Eastern Florida State College — Cocoa, Florida

TECHNICAL SKILLS

Programming & Scripting Languages | Python, C, Verilog, MIPS Assembly, HTML, CSS, JavaScript, LaTeX
Software Tools and Applications | Vivado, MATLAB, LTSpice, Excel, MARS, CircuitLab
Tools | Breadboard, Power Supply, Multimeter, Oscilloscope, Function Generator, Soldering and Wiring Station
Relevant Coursework | Linear Circuits II, Digital Systems, Computer Organization, Leadership in Engineering I
Upcoming Coursework (2026) | Electronics I, Embedded Systems, Junior Design, Leadership in Engineering II

WORK EXPERIENCE

Undergraduate Learning Assistant (ULA) — **August 2025 – Present**
University of Central Florida — Orlando, Florida

- Supported instruction by attending lectures, maintaining communication with professors, and assisting with course administration through proctoring quizzes and exams.
- Provided direct academic support by holding regular office hours and offering after-hours tutoring.
- Held weekly circuit analysis lab sessions for about 90 students, leading them through textbook problems, experiments, and safe equipment use.

Ecommerce Data Intern — **May 2024 - Jan 2025**
Pelican Sales — Melbourne, Florida

- Managed pricing updates via Excel and Shopify to update prices and inventories for an ecommerce shop.
- Ensured timely inventory data accuracy through routine updates.

PROJECTS

KR26 – Ongoing Project with UCF Formula SAE — **Starting September 2025**

- Assigned to design and test a strain gauge circuit with an operational amplifier for suspension load measurement. Electronics subsystem work will begin in early September.

Project Kestrel – Fully Autonomous Drone Sponsored by Blue Origin — **June 2025 - September 2025**

- Ran simulation to validate node performance and assisted with hardware integration and debugging.
- Shadowed the Embedded Hardware team during PCB assembly.

Electrical & Computer Education – Educational Website — **May 2025 - Present**

- Designed and developed Electrical & Computer Education (ecedu.org), a custom-built educational platform showcasing detailed course notes, problem solutions, and interactive learning resources for ECE classes, notably Linear Circuits I and Digital Systems.
- Implemented the site entirely using handwritten HTML, CSS, and JavaScript, without frameworks.
- Continuously maintaining and expanding the platform as an ongoing project, incorporating user feedback, adding new course content, and continuously improving the site's accessibility and technical robustness.
